

OMNIACCESS™
KNEE RETRACTOR SYSTEM

Consistent Exposure Time After Time

Efficient Hands-Free Access

OMNIACCESS™

KNEE RETRACTOR SYSTEM

This system provides consistent exposure during total and unicompartmental knee arthroplasty procedures and revisions. The table-mounted system increases surgical team effectiveness and improves staff efficiency.

FLEXIBLE

Open wishbone design allows easy repositioning of both frame arms and knee during procedure

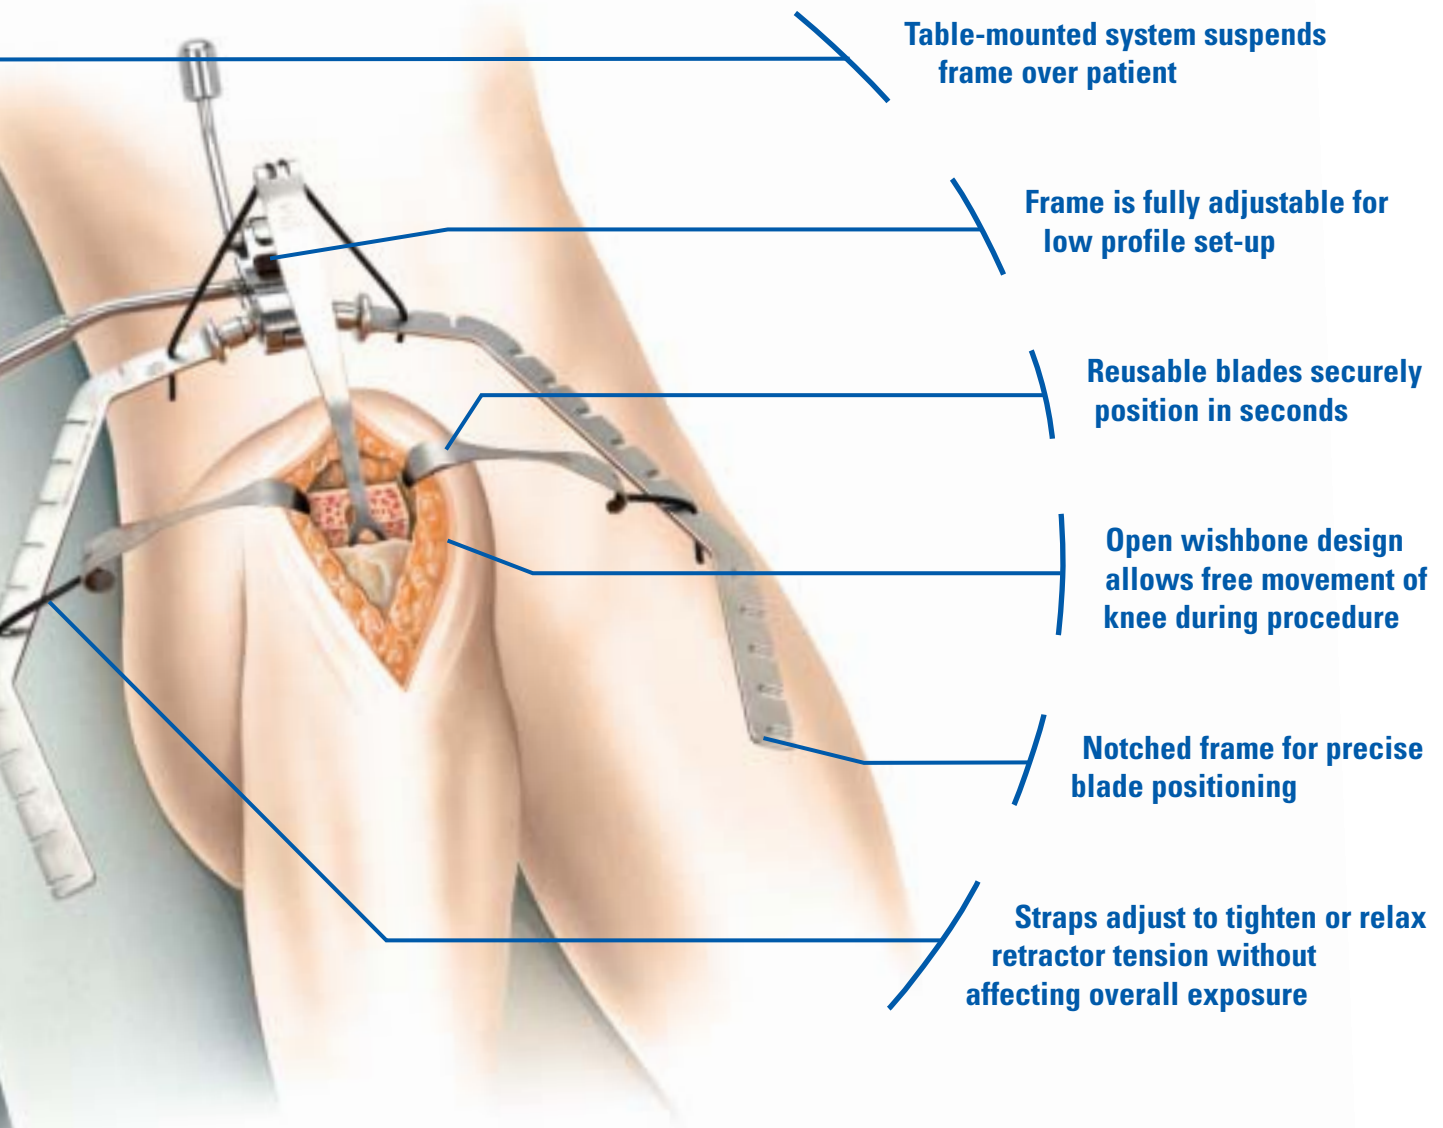

CONSISTENT

Less variation in retraction with repeatable exposure across different patient types

EASY SET-UP

Quick connection to surgical table for rapid attachment

Consistent Retraction Every Time

VERSATILE

Adaptable to individual surgeon techniques and preferences

EFFICIENT

Frees surgical team from holding retractors during procedure

5400 OmniAccess Knee Retractor System
